

## **Surgical Liposuction**

---

- Invasive, small incisions
- Local anesthesia
- Pain meds might be necessary
- Removes 100% unwanted fat from an area within one procedure
- See the results immediately
- 2-4 days downtime
- Dramatic results

## **Non-Surgical Body Contouring**

---

- Non-invasive
- No anesthesia needed
- No pain meds necessary
- Removes about 20% fat from an area. Several sessions may be necessary
- Takes months to see the end result
- No downtime
- Less dramatic results
